

S-TECH 200

SPECIALIZED VEHICLE AND
EQUIPMENT TRACK SYSTEMS

Your
off-road
partner.

A TRACK SOLUTION TO ENHANCE YOUR VEHICLE’S CAPABILITIES AND VERSATILITY

Designed to perform where it matters most, this system reduces soil compaction and disturbance while improving vehicle stability on uneven and hilly terrain. It also increases flotation and traction for more controlled, efficient operation in challenging field conditions.

Discover the versatility a track system brings to your vehicle; you won’t want to go without it.

ADAPTABLE TRACK SYSTEM FOR A WIDE RANGE OF APPLICATIONS

- Tree shakers
- Various orchard and vineyard vehicles
- Utility tractors
- Sprayers and applicators
- Specialized harvesters
- Small industrial vehicles of all types

ENJOY AN OPTIMAL FLOTATION

The ground contact area of the S-TECH 200 is up to 4 times greater than tires of the same width. This gain enables you to reduce soil compaction and increase crop production. It also means that you will get a constant access to your field, even in wet conditions.

FIELD-TESTED SYSTEM

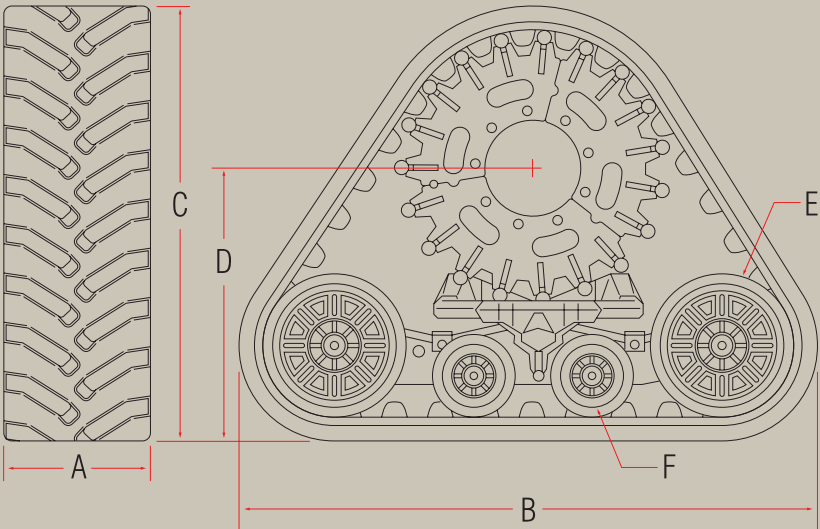

- Proven performance through years of real-world use.
- Built with high-quality components and materials.
- Easy, cost-effective maintenance.
- Proudly made in Canada.

TECHNICAL SPECIFICATIONS

A	12 in (305 mm)
B	49 in (1,235 mm)
C	36 in (922 mm)
D	23 in (578 mm)
E	12 in (305 mm)
F	7 in (178 mm)

Weight: 1,604 lb (727.6 kg)
Load capacity: 6,700 lb (3,039.1 kg)
Total ground contact area for 2 tracks:
768 in² (0.49 m²)
Total ground contact area for 4 tracks:
1,536 in² (0.99 m²)

Let's start the fieldwork *together.*
